SUMMARY

Full-stack software developer with 5+ years shipping production web applications (B.S. Computer Science, UBC). Builds TypeScript products with React, Next.js, Node.js, PostgreSQL, AWS, and Firebase. Led development of Kukarella and two sibling SaaS products (5,000 monthly active users, Anthropic Claude AI features); built client products and the Plutaro AI platform at Plutaro Studio; shipped Bubbas Closet (Next.js/Stripe). Canada remote.

WORK EXPERIENCE

Bubbas Closet | Full-Stack Developer (Contract) — Kelowna, BC | Jul 2026 – Oct 2026

- Built and shipped mybubbascloset.ca from the ground up: Next.js and TypeScript with Stripe tiered subscriptions, Firebase Auth and Firestore, and a custom rental/return admin (not Shopify).

Xambi Tech (Plutaro Studio) | Software Developer — Remote | Feb 2025 – Feb 2026

- Developed full-stack web applications using TypeScript, JavaScript, React, Node.js, and PostgreSQL across 15+ client websites and software projects, including SiteCurve, an enterprise SEO analytics platform.
- Designed Plutaro, an internal AI build platform and workflow framework that automated project setup and increased team productivity by 3x; helped build its successor, the public Plutaro AI app builder.
- Developed, tested, and troubleshot features end to end; participated in code reviews with remote teammates.

Saturn Animation Studios | Lead Developer — Kelowna, BC | May 2020 – Aug 2024

- Architected three full-stack SaaS products, Kukarella (AI text-to-speech), Site Report Builder, and Minutes Builder, using React/Next.js and Node.js/Express, serving 5,000 monthly active users.
- Built AI features with Anthropic Claude: Site Report Builder's automated inspection reports cut report time by 80% versus writing by hand, and Minutes Builder turned meeting transcripts into minutes.
- Built REST APIs and NoSQL databases; evolved cloud infrastructure with Docker, CI/CD, and AWS, improving deployment efficiency by roughly 40%.
- Led a two-person development team; collaborated with product ownership on requirements and scope; conducted code reviews and partnered with QA.

PROJECTS

Local Events & Specials App — Mar 2026 – Present

- In-development React Native (Expo) app with a Node backend and Next.js admin for Okanagan restaurant and bar events and specials; ingestion via Google Places API, website scraping, and ChatGPT.

SKILLS

Languages: TypeScript, JavaScript, Java, HTML, CSS
Frontend & Backend: React, Next.js, Redux, Tailwind CSS, React Native, Expo, Node.js, Express, REST APIs
Data & Cloud: PostgreSQL, MySQL, SQL, NoSQL, Firestore, AWS, Firebase, Docker, CI/CD, Stripe
