SUMMARY

Full-stack software developer with 4+ years building enterprise SaaS applications using React, Next.js, and Node.js. Led a two-person development team, shipped products serving 5,000 monthly active users, and built AI-powered workflow tools that improved operational efficiency by up to 80%.

WORK EXPERIENCE

Xambi Tech Feb 2025 – Feb 2026
Software Developer Remote

- Delivered 20+ client websites and software projects using repeatable AI-assisted development workflows.
- Designed and implemented a standardized AI workflow framework that automated project setup and increased team productivity by 3x across client engagements.
- Built Plutaro, an internal development platform that operationalized the company's AI-driven build process and accelerated project delivery.

Saturn Animation Studios May 2020 – Aug 2024
Lead Developer Kelowna, BC

- Architected and delivered three enterprise SaaS applications using Next.js/React frontend and Node.js/Express backend, serving 5,000 monthly active users.
- Led a two-person development team, managed workflows, and collaborated directly with the product owner to gather requirements and define project scope.
- Designed and implemented CI/CD pipelines and automated testing protocols, improving deployment efficiency by 40%.
- Built AI-powered solutions using Claude 3.5, including an automated site inspection reporting system that improved inspector workflow efficiency by 80%.

University of British Columbia Jan 2020 – Apr 2020
Teaching Assistant Kelowna, BC

- Instructed 30+ undergraduate students through hands-on Java programming labs focused on OOP, data structures, and algorithms.
- Delivered weekly technical lectures and code review feedback to support student skill development.
